

Music For Your Ceremony

If your ceremony is in the same place as your reception, we would like to advise you of the different options you have if you need any sound support or audio assistance from us. This sheet is intended to give you a full understanding of what is involved and the additional charges incorporated with different levels of service. Please indicate below your choice with these additional services and return this form with your signed agreement. Please remember that any use of our staff or equipment must fall within the performance times listed on your agreement.

The first thing to determine would be the distance from where you want us set up for the reception to where you would want sound at the ceremony. If the distance is within thirty feet, we can move a speaker and operate the sound system from the reception location. There is no additional charge for this.

If the distance is within 100 feet, we can still set the system up once at the site of the reception, but provide you with an extra long speaker cable at an additional cost of \$25.

Now if the distance is greater than 100 feet, the only option that we would have would be to set up our sound system once for your ceremony, then take it down and move it to set it up again for your reception. Due to the complexity involved with this, and the difficulty for a DJ to move a system in his tuxedo, we would have to send out additional roadie support at an additional charge of \$100. If your function is outside the city limits of San Antonio, Austin, or Corpus Christi, there would also be a charge of \$50 as a travel fee. This also does not account for any additional charge for stairs. If this option is selected, please also be aware that there can be up to one hour of time where there is no sound system available.

At any time, if the DJ will not have a direct line of sight to the ceremony, we will need the help from one person on your end to help with cues and volume levels. An usher is usually ideal for this role.

You will always have full access to our corded microphone which can stretch up to 25 feet from wherever our sound system is located. If you have a need for wireless microphones, we can provide both handhelds and lavalier (clip-on) microphones for you. They would only be operable within 100 ft. of our sound system and are available at a cost of \$50 each.

It would also be extremely helpful to have a written script of the ceremony. This script should indicate what songs to play, in what order, how much of the song to play, and the out-cue from the priest or minister as an indication of when to start the song.

We understand the importance of your ceremony and the integration of music and certain meaningful songs. We would love to help in any way that we can.

____ I will not need any sound assistance for my ceremony.

____ I would like for you to place a speaker up to 30 ft. away at no charge.

____ I would like for you to place a speaker up to 100 ft. away at a charge of \$25.

____ I would like for you to set the system up at my ceremony at a charge of \$100.

____ My function is within the city limits as described above.

____ My function is outside the city limits and I'm aware of the additional \$50 charge.

I would like ____ handheld wireless microphones and ____ lavalier microphones at an additional charge of \$____. (\$50/ea)
